

Subversion

We provide Subversion repositories for your project or diploma work. To create a repository we need the following information:

- name of the project (all lowercase, no spaces or special chars)
- a list of usernames (BFH usernames) which should get access to the repository

Send the request for the repository to our [Helpdesk](#). We will inform you as soon as it is done.

The Subversion data is backed up on a daily basis.

To checkout a repository simply type:

```
svn checkout --username BFHusername  
https://svn.bfh.ch/repos/repoType/repoName
```

Where repoType is in {labs, misc, modules, projects, staff, web}.
